

## SMA Female to Straight Cut Lead Test Probe Cable 3 Inch Length Using PE-SR047FL Coax

### RF Cable Assemblies Technical Data Sheet

PE3C1057-3

#### Configuration

- Connector 1: SMA Female
- Connector 2: Straight Cut Lead
- Cable Type: PE-SR047FL

#### Features

- Max Frequency 18 GHz
- 100% RF Tested prior to final trim
- 1.4 Max VSWR to 18 GHz
- 100% High Pot Tested to 500V
- 0.047 Diameter Formable coax
- Individually packed in protective tube

#### Applications

- General Purpose
- Test & Measurement
- Laboratory Use
- Used as an RF Test Probe to 18 GHz
- RF PCB Board Measurements
- Signal Injection

#### Description

Pasternack's PE3C1057-3 50 ohm SMA Female to straight cut cable using PE-SR047FL coax is part of our full line of RF components available for same-day shipping. Pasternack's formable cable assemblies provide a convenient alternative to their semi-rigid versions, as they offer similar electrical performance but can be bent to desired shape without the use of special tools.

These SMA Female to unterminated flush cut cable assemblies are designed to be used as convenient test probes. The unterminated end of the cable can be trimmed by the user to their desired dimensions. A common research and development application is to solder the trimmed end of the cable to an exposed microstrip trace to inject a signal or to measure a signal of interest. Each cable assembly is individually packaged in a reusable protective tube. These test probes have been 100% RF tested as a two-ended assembly prior to trimming to verify the assembly's performance to 18 GHz with a maximum VSWR of 1.4:1. Pre-Trimmed Test Probes are also available.

Custom versions of most RF cable assemblies can be built and shipped same day. Custom cable assembly lengths can be obtained by specifying the desired length on the web site at time of order or by contacting a sales representative. Other available RF cable assembly value added services include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly.
